Sold in units of:

1 kg tin

5 kg bucket

Blattisan®

Specialities for calves

Blattisan® *Albis Akut*

Stops diarrhea in acute cases

- apple pomace, dextrose, algae meal
- electrolytes and vitamins

supply of electrolytes and energy

easy to use

high supply of vitamin C for immune protection

effectively alleviates scours

Dosage:

70 g per meal dissolved in 2 l of water, second and third dose after 8 hours each (in addition to milk trough)

Sold in units of:
1,400 g bucket

Blattisan® *Diät*

Electrolyte trough powder supplement during and after diarrhea

- electrolytes
- glucose
- sodium citrate
- bicarbonates

prevents dehydration

supports the cell function

ensures energy supply

counteracts overacidification

easy absorption

Dosage:

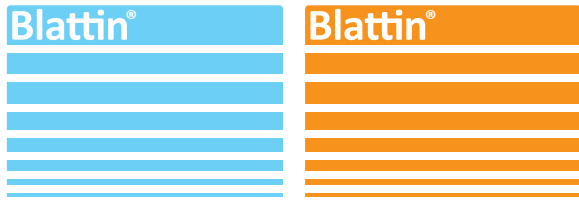

50 g per litre of water (30°C)

Sold in units of:

1 kg tin, 5 kg bucket, 10 kg and 25 kg bags

In cases of severe diarrhea, always consult your veterinarian.

Blattisan® Blattiviko®

Specialities for calves

Blattisan® *Diät liq*

Liquid!

Electrolyte trough supplement during and after diarrhea

- electrolytes
- glucose
- sodium citrate
- bicarbonates

liquid version against dehydration

Supply of electrolytes and energy for cell functions

easy absorption

Dosage:
Mix 40 ml in 1 litre of water (30°C)

Sold in units of:
1 l bottle

Blattiviko® *Plus*

Water-soluble vitamin concentrate

- rapid effect
- high vitamin concentration
- dextrose

support in case of disease

support during periods of stress

Dosage:
20 kg per tonne of complete feed

Sold in units of:
1 kg tin
5 kg bucket
10 kg bag
25 kg bag

Blattisan®

Specialities for calves

Supplement for healthy airways

- plant extracts
- ethereal oils
- vitamins E and C

stabilises the lung function

support in case of coughing

boosts immunity

recommended as stabling prophylaxis

Dosage:
25 g per animal and day

Sold in units of:
10 kg, 25 kg bags

Milk Replacer

After the colostrum period, the right choice of a milk replacer is decisive for the future success in calf breeding. We recommend a replacer with increased levels of skimmed milk powder or a similar high-quality wheyish milk replacer for the first three weeks.

All Blattina® replacers are easily soluble, highly digestible and much appreciated by calves.

The Blattina® programme consists of three product lines:

1. The **Premium line** for highest demands and quality
2. The **Classic line** for safety and quality
3. The **Profi line** with reasonably priced products

1. **Premium line** for highest demands and quality

Blattina calf milk- **Premium line**

	Blattina M	Blattina Best Of	Blattina Quick Step A	Blattina C sauer
skimmed milk powder	X			
whey powder	X	X	X	X
