

Blattimin®

Special feed concentrates

With our the Melk Mix Line we offer a complex, innovative program for the milk pro with highest performance . The special selection of raw materials enables targeted and continuous nut-

rient supplement. During laktation peak a lined feeding is successful. The milk cows remain viable and stable in performance.

Blattimin® *Melk Mix Sweet*

Supplementary feed for dairy cows at energy shortage

- dextrose
- maize
- protected fat

optimal supply of rumen bacteria

ideal power supply of small intestine

energy balance at high milk yield

reduces the risk of ketosis

Dosage:
0.5 - 1.0 kg per cow per day, depending on ration

Sold in units of:
Big Bag

Blattimin® *Melk Mix Protipower*

Supplementary feed for dairy cows at protein shortage

- protected raps
- maize
- rapidly and slowly degradable feed urea
- dextrose
- brewer's yeast

continous protein supply

balanced rumen synchronisation

favors stable metabolism

savings of expensive soybean meal

Dosage:
0.5 - 1.0 kg per cow per day, depending on ration

Sold in units of:
Big Bag

Blattimin®

Special feed concentrates

Blattimin® *Melk Mix Kombi*

Supplementary feed for dairy cows to compensate for protein and energy shortage

- maize
- rumen-protected fat
- rapidly and slowly degradable feed urea
- dextrose

optimal supply of proteins

guarantees high energy density

ideal rumen synchronisation

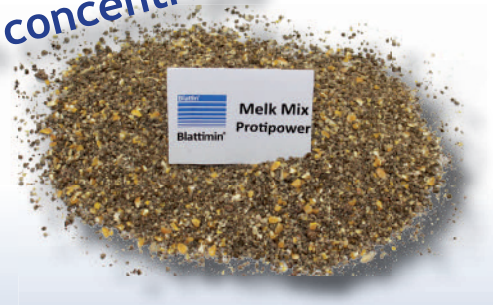

Dosage:
0.5 - 1.0 kg per cow per day, depending on ration

Sold in units of:
Big Bag

energy concentrate

protein concentrate

combi concentrate
